Professional Summary

B.Tech Artificial Intelligence student graduating in 2026 with practical experience in Full Stack Development, AI/ML, and Cloud Technologies. Strong foundation in Python, Django, JavaScript, Data Structures, OOP, and problem solving. Built responsive web applications, machine learning prediction systems, and deployed cloud-based solutions.

Education

Aditya College of Engineering & Technology	2026
Bachelor of Technology, Artificial Intelligence	India

Technical Skills

Programming	: Python, JavaScript, Java, C
Frontend	: HTML5, CSS3, JavaScript (ES6+), React
Backend	: Flask, Django, Node.js (basic)
Database	: SQL, Database Fundamentals
AI/ML	: Scikit-learn, XGBoost, Pandas, NumPy
Cloud	: AWS EC2, S3, VPC, Lambda, Route53, EBS, SNS
Core CS	: Data Structures, Algorithms, OOP, DBMS
Tools	: Git, GitHub, VS Code, Azure AI Services

Experience

AIML Intern	Oct 2025 – Mar 2026
Andhra Pradesh State Skill Development Corporation, India	

- Worked on machine learning models using Python, Pandas, and Scikit-learn.
- Performed data preprocessing, feature engineering, model training, and evaluation.
- Built predictive solutions using classification algorithms and improved model accuracy.
- Gained hands-on experience in real-world AI/ML workflows and deployment basics.

DevOps Intern	May 2025 – July 2025
Andhra Pradesh State Skill Development Corporation, India	

- Built and deployed cloud-based web applications on AWS with real-world hosting experience.
- Configured AWS services including EC2, S3, VPC, Lambda, and Route53.
- Integrated AWS Rekognition API into Python Flask applications.
- Worked with SNS and EBS for notifications and storage systems.

Programming Trainee	Nov 2022 – Apr 2024
Technical Hub, Kakinada, Andhra Pradesh	

- Completed structured coding programs in C and Java fundamentals.
- Practiced loops, arrays, functions, OOP, debugging, and logical problem solving.
- Solved real-time coding challenges to improve programming skills.

Projects

Rainfall Prediction Pipeline Python, Flask, Scikit-learn, XGBoost	2026
--	------

- Developed end-to-end machine learning pipeline to predict rainfall using weather data.
- Performed preprocessing, imputation, encoding, scaling, model comparison, and evaluation.
- Trained models including Logistic Regression, Random Forest, SVM, and XGBoost.
- Deployed prediction system using Flask web application with interactive UI and API endpoint.

Sentiment Analysis Tool Python, Flask, AWS Lambda	2025
--	------

- Built sentiment analysis application with Python backend and Flask interface.
- Deployed serverless components using AWS Lambda for scalable processing.
- Strengthened backend development, APIs, and cloud deployment fundamentals.

Restaurant Feedback System HTML, CSS, JavaScript	2024
---	------

- Designed responsive feedback web application aligned to frontend development stack.
- Implemented dynamic forms, star rating system, CRUD operations, and interactive UI.
- Demonstrated clean semantic HTML, modular CSS, and user-focused design principles.

Certifications

- ITS: HTML and CSS – Certiport
- ITS: Java – Certiport
- IT Specialist: Python – Certiport
- Microsoft Certified: Azure AI Fundamentals
- Deloitte Australia Cyber Job Simulation
