Profile Summary

Final-year B.Tech student (Artificial Intelligence & Machine Learning, 2026) with hands-on experience in Full Stack Web Development and AWS Cloud services. Skilled in building serverless applications and responsive web interfaces using HTML, CSS, JavaScript, AWS Lambda, API Gateway, and cloud-native architectures.

Technical Skills

Programming Languages: Python, Java, C

Web Technologies: HTML, CSS, JavaScript

Cloud: AWS (EC2, S3, Lambda, API Gateway, DynamoDB, VPC, Route 53, Rekognition, SNS, EBS)

Databases: MongoDB, SQL

Tools: Git, Streamlit, Postman

Education

Aditya College of Engineering and Technology

Nov 2022 – Apr 2026

B.Tech in Artificial Intelligence and Machine Learning

GPA: 7.03 / 10.0

Relevant Coursework: Artificial Intelligence, Machine Learning, Deep Learning

Experience

AWS Cloud Computing – DevOps Intern

May 2025 – July 2025

APSSDC

- Built a fully serverless sentiment analysis application using **AWS Lambda, API Gateway, Amazon S3, and Amazon Comprehend**.
- Developed a **Python (Boto3)** backend and a secure **S3-hosted frontend** for real-time sentiment processing.
- Optimized scalability, cost-efficiency, and reliability through proper **IAM configuration, CORS handling**, and end-to-end API testing using **Postman**.

Technical Trainee

Nov 2022 – Apr 2024

Technical Hub, Surampalem, AP

- Strengthened programming and problem-solving skills in C, Python, and Java.
- Developed AI/ML models using supervised and unsupervised learning techniques.
- Implemented algorithms including regression, decision trees, and basic neural networks.

Projects

AWS Serverless Sentiment Analysis

- Tech Stack: AWS Lambda, Amazon Comprehend, API Gateway, S3, IAM, Python (Boto3), JavaScript.
- Built a fully serverless sentiment analysis system using AWS Lambda, API Gateway, S3, and Amazon Comprehend to deliver fast, real-time text classification with secure IAM access control..
- Designed and deployed the end-to-end cloud architecture with a static S3 frontend and REST APIs, achieving a 1002025 internship..

Facial Recognition Attendance System

- Developed a real-time facial recognition attendance system using AWS Rekognition.
- Stored images and attendance data using Amazon S3 and DynamoDB.
- Built an interactive frontend using Streamlit.

Restaurant Feedback Web Application

- Designed and developed a responsive web application using HTML, CSS, and JavaScript.
- Enabled users to submit feedback and ratings via a clean, user-friendly interface.
